8. FINANCIAL INSTRUMENTS AND RISK FACTORS*Fair value*

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

The Company's financial instruments include cash, receivables and accounts payable and accrued liabilities. The carrying value of these financial instruments approximates their fair value. Cash is measured based on Level 1 inputs of the fair value hierarchy.

The following is an analysis of the Company's financial assets measured at fair value as at June 30, 2021 and December 31, 2020:

	As at June 30, 2021		
	Level 1	Level 2	Level 3
Cash and equivalents	\$ 10,261,694	\$ -	\$ -

	As at December 31, 2020		
	Level 1	Level 2	Level 3
Cash and equivalents	\$ 6,204,877	\$ -	\$ -

Risk factors

The Company is exposed in varying degrees to a variety of financial instrument related risks.

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company has cash balances but no interest-bearing debt. The bank account is held with a major Canadian bank. As all of the Company's cash and equivalents are held by one bank, there is a concentration of credit risk with the bank. This risk is managed by using a major bank that is a high credit quality financial institution as determined by rating agencies. The Company's secondary exposure to risk is on its receivables. This risk is minimal as receivables consist primarily of refundable government sales taxes.

Currency Risk

Currency risk is the risk that arises from the change in price of one currency against another. The Company operates in Canada and is therefore not exposed to foreign exchange risk arising from transactions denominated in a foreign currency.

8. FINANCIAL INSTRUMENTS AND RISK FACTORS (cont'd)

Interest Rate Risk

Interest rate risk is the risk due to variability of interest rates. The Company is exposed to interest rate risk on its bank account. The income earned on the bank account is subject to the movements in interest rates. The Company has cash balances and no-interest bearing debt, therefore, interest rate risk is nominal.

Liquidity Risk

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. The Company's objective in managing liquidity risk is to maintain sufficient readily available reserves in order to meet its liquidity requirements at any point in time. The Company achieves this by maintaining sufficient cash balances.

Funding risk is the risk that market conditions will impact the Company's ability to raise capital through equity markets under acceptable terms and conditions. Under current market conditions, both liquidity and funding risk have been assessed as high.

9. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its exploration and evaluation interests, acquire additional exploration and evaluation interests and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes the components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

The Company currently is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management.

10. SEGMENTED INFORMATION

The primary business of the Company is the acquisition and exploration of mineral properties in Canada.
