STRIKEPOINT GOLD

Let's talk *Northumberland.*

A *multi-million-ounce* gold deposit, located in Nevada.

A past-producing Nevada asset on private ground, to be acquired by StrikePoint Gold from Newmont

CAUTIONARY STATEMENTS

Not an Offer
This presentation is for information purposes only. It is not an offer for the purchase or sale of securities and it is not intended to be relied upon. Although all information is derived from sources which StrikePoint Gold Inc. ("**StrikePoint**" or the "**Company**"), and its officers, directors and advisors believe to be reliable and accurate, neither StrikePoint, or its officers, directors or advisors warrant its accuracy. Recipients are advised to conduct their own due diligence.

Forward Looking Information
This presentation contains certain forward-looking statements and forward-looking information as defined under applicable Canadian securities laws. Statements contained in this presentation that are not historical facts are forward-looking statements that involve known and unknown risks and uncertainties. Any statements that refer to expectations, projections or other characterizations of future events or circumstances contain forward-looking statements. In certain cases, forward-looking statements and information can be identified using forward-looking terminology such as "may", "will", "would", "could", "expect", "intend", "estimate", "anticipate", "believe", "continue", "plans", "potential" or similar terminology. Forward-looking statements and information are made as of the date of this presentation, and include, but are not limited to, the potential acquisition of the Northumberland Gold Project, including the proposed cash consideration of up to US$70 million payable at closing, and two contingent payments of up to US$25 million payable upon the achievement of certain milestones (including completion of a feasibility study and commencement of commercial production), and an equity financing in connection therewith; the conditions to the completion of the proposed acquisition included in the definitive documentation relating thereto, including receipt of TSX Venture Exchange ("TSXV") approval; exploration plans and other future plans and objectives for the Northumberland Gold Project and the Company's other mineral projects, including the Hercules Gold Project and the Cuprite Gold Project; the anticipated use of proceeds from the proposed equity financing; and the plans and goals of the Company, including the timing of any proposed drill program and the targeted completion of a preliminary economic assessment.

These forward-looking statements represent management's current beliefs, expectations, estimates and projections regarding future events and operating performance, which are based on information currently available to management, management's historical experience, perception of trends and current business conditions, expected future developments and other factors which management considers appropriate. Such forward-looking statements involve numerous risks and uncertainties, and actual results may vary. Important risks and other factors that may cause actual results to vary include, without limitation, risks related to the ability of the Company to complete the proposed acquisition of the Northumberland Gold Project on the terms described herein or at all; the ability of the Company to accomplish its plans and objectives with respect to the acquisition and development of its projects within the expected timing or at all; the timing and receipt of certain required approvals, including TSXV approval for the acquisition and related financing; other risk factors related to the Northumberland Gold Project as disclosed in this presentation; changes in commodity prices; costs of production; unanticipated reclamation costs; unexpected variations in quantity of mineralised material, grade, or recovery rates; risks inherent in exploration estimates and results; risks inherent in exploration and development activities; changes in development or mining plans due to changes in logistical, technical or other factors; unanticipated operational difficulties (including failure of plant, equipment or processes to operate in accordance with specifications, cost escalation, unavailability of materials, equipment or third party contractors, delays in the receipt of government approvals, industrial disturbances, job action, and unanticipated events related to local communities, health, safety and environmental matters); changes in governmental regulation of mining operations; political risk; social unrest; changes in general economic conditions or conditions in the financial markets; risks related to the Company's ability to complete future financings on the terms anticipated, or at all; and other risks related to the ability of the Company to proceed with its plans for its mineral projects.

In making the forward-looking statements in this presentation, the Company has applied several material assumptions, including without limitation, the assumptions that: market fundamentals will result in sustained mineral demand and prices; the proposed acquisition of the Northumberland Gold Project will be completed on the terms and timeline currently anticipated by management; any necessary approvals and consents in connection with the proposed acquisition and the development of its projects will be obtained; financing for the proposed acquisition and the development, construction and continued operation of its projects will continue to be available on terms suitable to the Company; and the Company will be able to carry out its exploration, drilling and work plans as anticipated by management.

Although the Company has attempted to identify important factors that could affect the Company and may cause actual actions, events, or results to differ materially from those described in forward-looking statements, there may be other factors that cause the actual results or performance by the Company to differ materially from those expressed in or implied by any forward-looking statements. Accordingly, no assurances can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what impact they will have on the results of operations or the financial condition of the Company. Investors should therefore not place undue reliance on forward-looking statements. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.

Market And Industry Data Obtained From Public Sources
This presentation includes market and industry data which was obtained from various publicly available sources believed by the Company to be true. Although the Company believes it to be reliable, the Company has not independently verified any of the data from third-party sources referred to in this presentation or analyzed or verified the underlying reports relied upon or referred to by such sources, or ascertained the underlying assumptions relied upon by such sources. The Company makes no representation as to the accuracy of such information.

The information contained in this presentation is comprised of "comparables," which is information that compares StrikePoint to other issuers. The other issuers in the comparables were included on the basis that they are gold exploration and development companies with open pit gold deposits in the United States, and are considered to be an appropriate basis for comparison to StrikePoint because they operate in the same or a similar industry and geographic region. Information about the other issuers in the comparables was obtained from public sources, including publicly filed technical reports, annual mineral resource and reserve statements, and corporate filings, and has not been independently verified by StrikePoint. There are many risks associated with relying upon the comparables to make an investment decision, including the risk that the performance of StrikePoint will not necessarily meet or exceed those of the comparable issuers, that the Company's mineral resources may not be converted to mineral reserves, and there is no guarantee that an investor will achieve a return on investment similar to those issuers. If the information concerning the comparables contains a misrepresentation, an investor in StrikePoint will not have a remedy under securities legislation.

Qualified Persons
Michael G. Allen, P.Geo, the Chief Executive Officer of the company and a QP as defined by NI 43-101, has reviewed and approved the scientific and technical information in this presentation. Mr. Allen as the Chief Executive Officer and a director of the Company is not independent of the Company.

The 2026 Northumberland Gold Project mineral resource estimate and other technical information related to the Northumberland Gold Project referenced herein is derived from the technical report entitled "NI 43-101 Technical Report, Northumberland Gold Project, Nevada, USA" prepared by Hebert Oliveira, B.Sc., P.Geo., Principal Resource Geologist at SLR Consulting (Canada) Ltd. ("**SLR**"), and Travis O'Farrell, P.Eng., Director, Processing and Metallurgy at Fuse Advisors, part of SLR, each a Qualified Person as defined by NI 43-101. Such document is referred to herein as the "**2026 Technical Report**".

Strikepoint *Gold* introduction...

01 **~140 km²** of prospective Walker Lane ground under StrikePoint control.

02 Drilling commenced with the goal of delivering a **maiden resource estimate at the Hercules Gold Project**

EXECUTIVE CHAIR & DIRECTOR

Shawn Khunkhun

20+ years in capital markets and mineral exploration & development. Involved in marketing, financing and corporate development. Facilitated over **$1B in capital raises** ; significant history of successful M&A and delivering shareholder value. Former CEO and Director of **Dolly Varden Silver**, currently President & Director of **Contago Silver and Gold.**

PRESIDENT, CEO & DIRECTOR

Michael G. Allen

Geologist with 20+ years' experience. Former President, CEO and Director of **Northern Empire Resources**, where he identified, acquired, and advanced the Sterling Project in Nevada's Beatty district. Guided Northern Empire from ~ **C$15M to ~C$120M** market cap; Sterling recently sold to AngloGold Ashanti for **US$150M**.

DIRECTOR

Adrian Fleming

Adrian Fleming is a professional geologist with over 40 years of experience with exploration and development stage mining companies in North and South America and Australia. He was a founding director of **Northern Empire**, and has served as a director of several other publicly traded companies including **Reunion Gold** and **Greenheart Gold.**

INCOMING CHAIR

Alan Pangbourne

+40 years of management and senior operational experience in the mining sector, with industry expertise in operations, engineering and major project development. Former **COO of SSR Mining Inc.** Currently a director of **OceanaGold,** where he leads the technical committee. Former CEO of **Guyana Goldfields**, VP Projects South America **Kinross,** 15+years **BHP**

Northumberland: A multi-million-ounce, high-grade gold project in Nevada.

Geologically most akin to **Betze-Post**— a **32 Moz** deposit*.

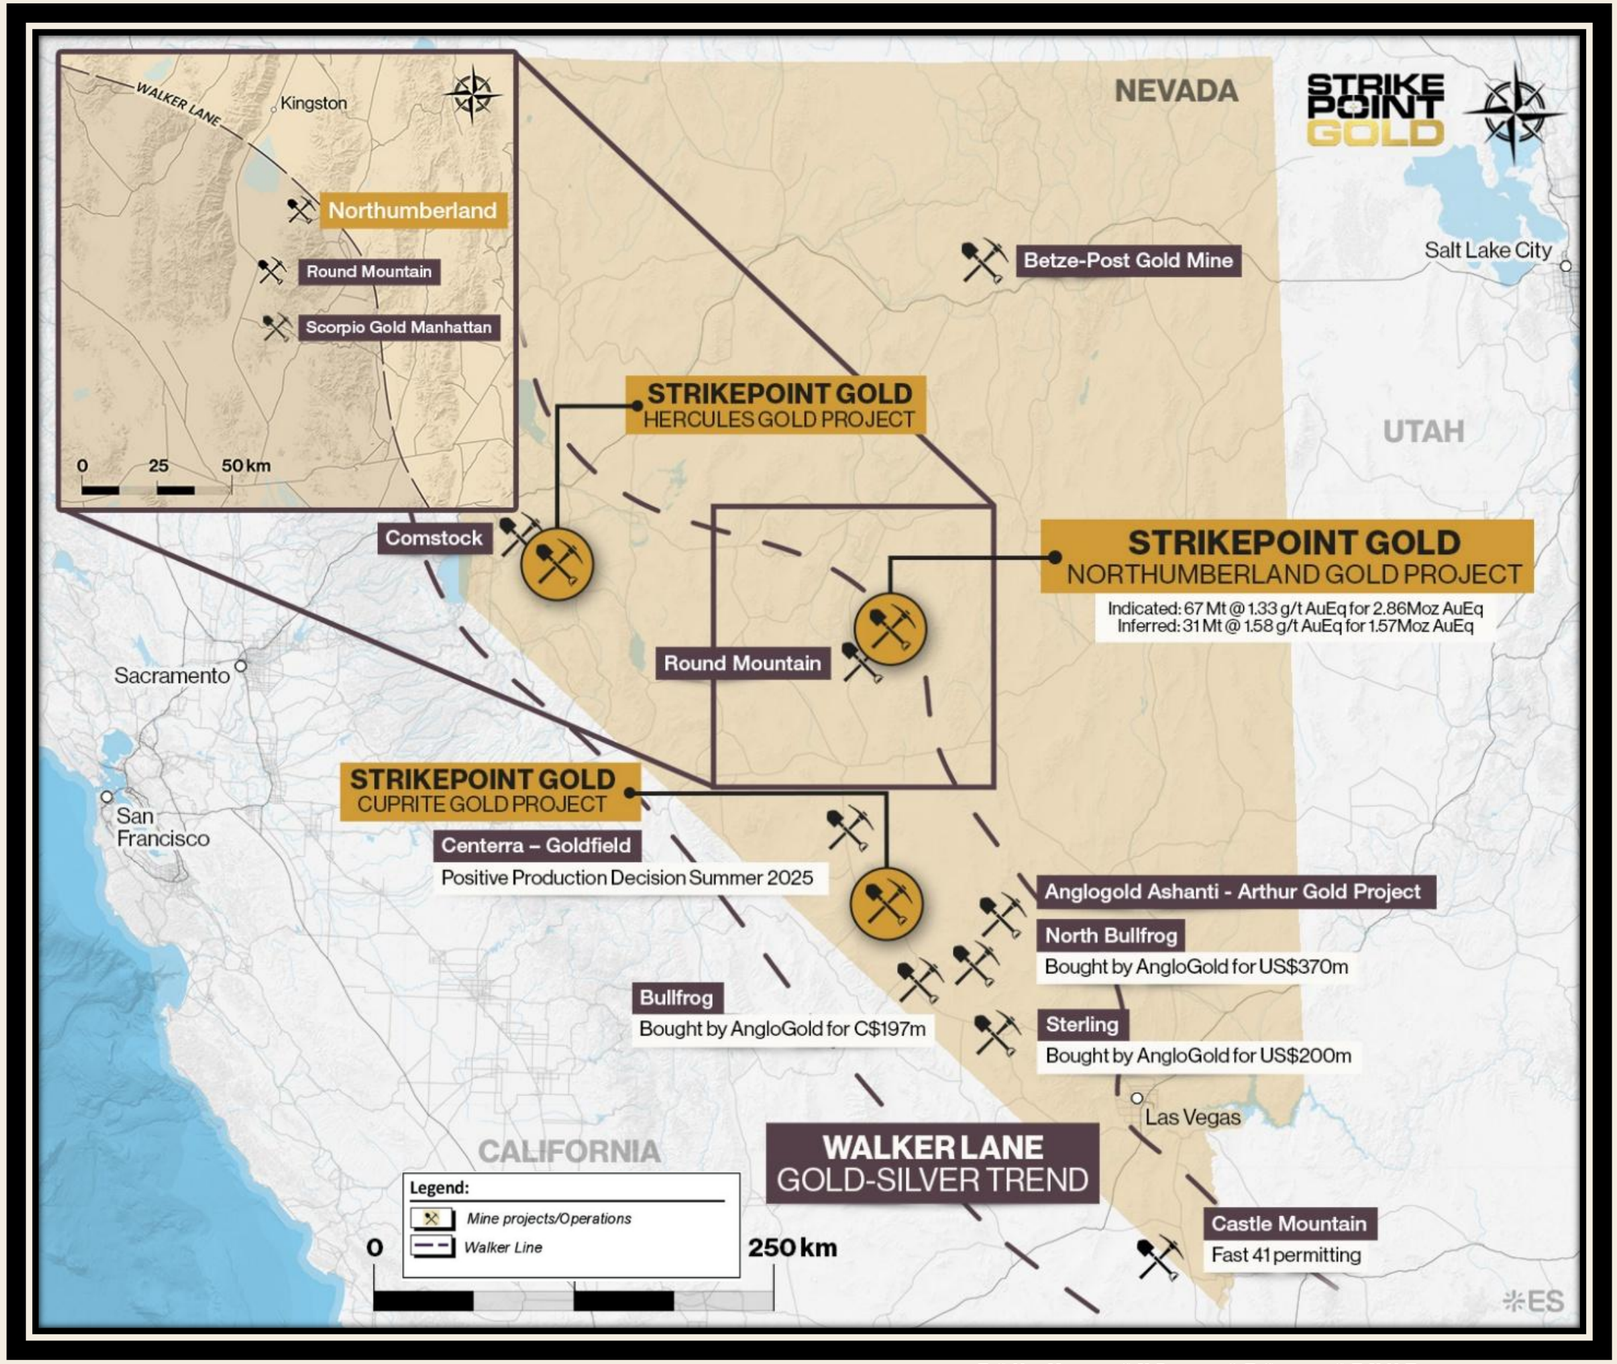
Northumberland is located **25 miles NE** of Kinross's Round Mountain.

Northumberland is a past producer, producing ~230Koz Au

Drillhole database of 1,548 drill holes/201.4km

Carlin Type Deposit

Walker Lane Location



* Comparison to Betze-Post is for illustrative/geological context only and not indicative of Northumberland's actual size or grade

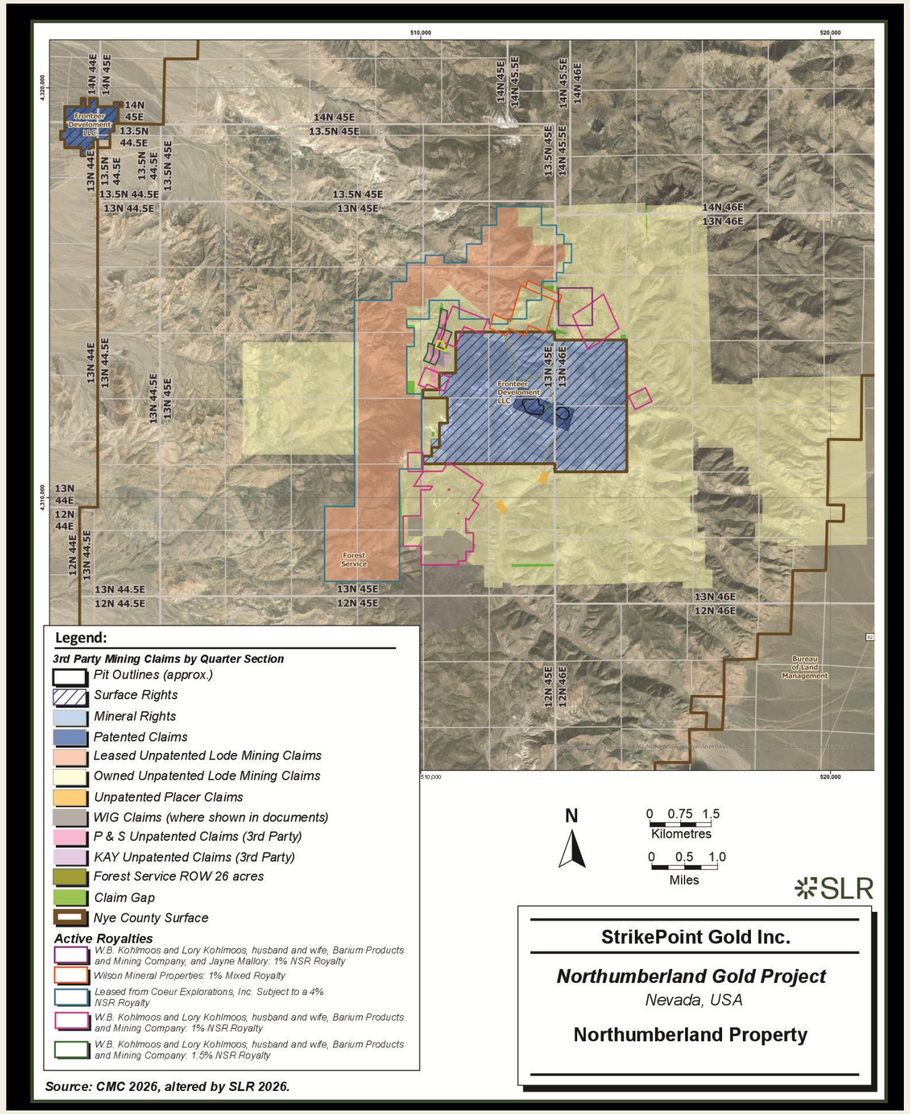
Summary of Northumberland Mineral Resources – Effective Date July 31, 2026

Category	Tonnage (kt)	Grade (g/t Au)	Grade (g/t Ag)	Grade (g/t AuEq)	Contained Metal (Au oz)	Contained Metal (Ag oz)	Contained Metal (AuEq oz)
Indicated	67,008	1.26	5.38	1.33	2,709,000	11,599,000	2,857,000
Inferred	30,967	1.53	4.28	1.58	1,519,000	4,260,000	1,568,000

Notes:

1. The MRE was prepared by Mr. Hebert Oliveira, B.Sc., P.Geo., Principal Resource Geologist at SLR, who is an independent Qualified Person (QP) for the purposes of National Instrument 43-101 Standards of Disclosure for Mineral Projects (NI 43-101).
2. This is the initial MRE for StrikePoint, and reflects revised price, cost, and technical assumptions over historical MREs, which should not be relied on. The MRE incorporates the CIM (2019) Estimation of Mineral Resources and Mineral Reserves (MRMR) Best Practice guidelines and the CIM (2014) definitions were followed for Mineral Resources.
3. Metallurgical recoveries consider oxidation state as defined by sulphide content: < 0.5% (oxide) and ≥ 0.5% (fresh), and further subdivide fresh material into low, medium and high preg robbing categories as estimated from preg robbing values (PRV) and assumed as follows:
    a. Oxide material: 75% for both Au and Ag
    b. Fresh, low PRV material: 90% Au; 70% Ag
    c. Fresh, medium PRV material: 80% Au; 60% Ag
    d. Fresh, high PRV material: 60% Au; 40% Ag
4. Gold Equivalent (AuEq) = Au(g/t) + (Ag(g/t) x (Ag price x Ag recovery / Au price x Au recovery)).
5. Mineral Resources are estimated at variable AuEq cut-off grades based on long term prices of US$3,500 per gold ounce and US$55 per silver ounce and Au and Ag recoveries by material type as follows: 0.16 g/t (oxide); 0.31 g/t (fresh, low PRV); 0.35 g/t (fresh, medium PRV); and 0.47 g/t (fresh, high PRV).
6. Mineral Resources are reported within an optimized pit shell, using the following assumptions:
    a. Overall pit slope angles of 45°
    b. Mining costs of US$2.12/tonne (t) mined
    c. G&A costs of US$1.35/t milled
    d. Processing costs of US$12/t milled (oxide); US$30/t milled (sulphide)
    e. In situ bulk density is 2.6 t/m^3.
7. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. There are no Mineral Reserves at Northumberland.
8. This Mineral Resource estimate includes Inferred Mineral Resources which have had insufficient work to classify them as Indicated Mineral Resources. It is uncertain but reasonably expected that Inferred Mineral Resources could be upgraded to Indicated Mineral Resources with continued exploration.
9. Numbers may not add or multiply accurately due to rounding.
10. The effective date of the Mineral Resource Estimate for Northumberland is July 31, 2026.
11. The QP is not aware of any environmental, permitting, legal, title, taxation, socio-economic, marketing, political, or other relevant factors not discussed in this report that could materially affect the Mineral Resource estimate.

Northumberland stands apart



01 **Tier-1 jurisdiction**
Nevada — #1 Ranked in 2025

02 **Resources on private ground – Past Producer**
Potentially streamlining the path to a production permit

03 **Drill permits in place**
Path to Engineering Studies, Potential Resource Expansion

04 **Water rights secured**
And more is available

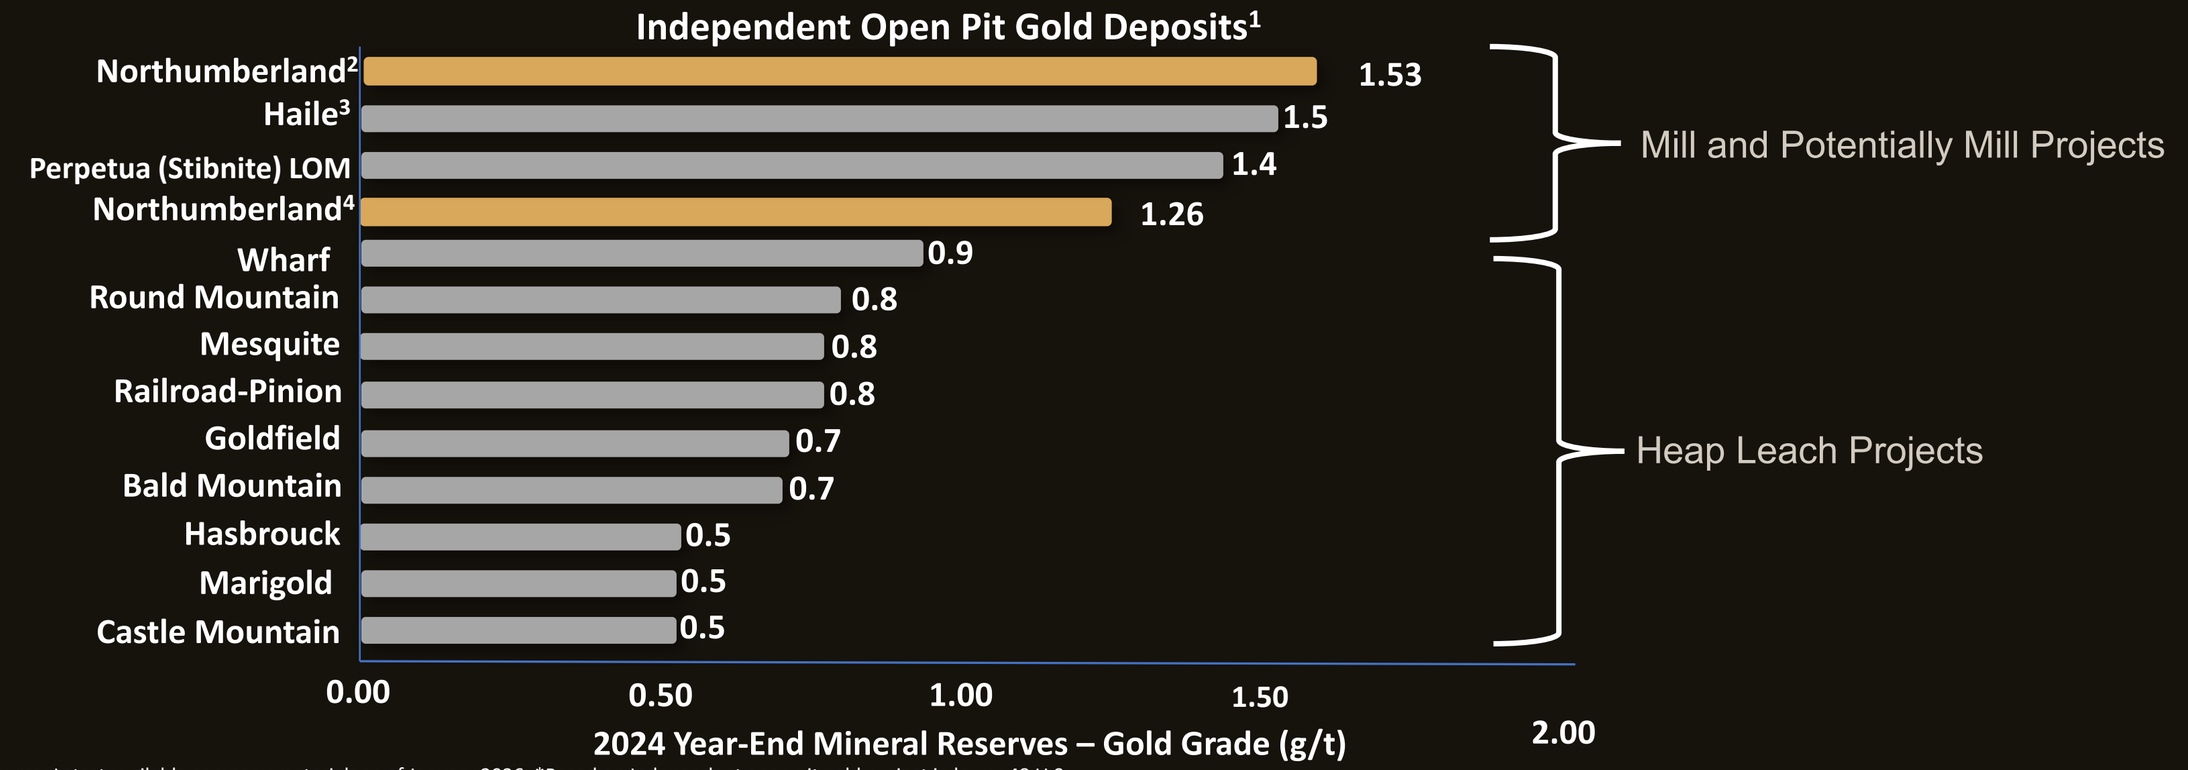
05 **Powerlines**
Transmission runs along the western flank of the property

06 **Positive initial Metallurgy**
Additional Testwork to optimize flowsheet planned

07 **Expansion Potential**
Multiple Near Resource Targets to be evaluated and drilled

Northumberland Grade in Context

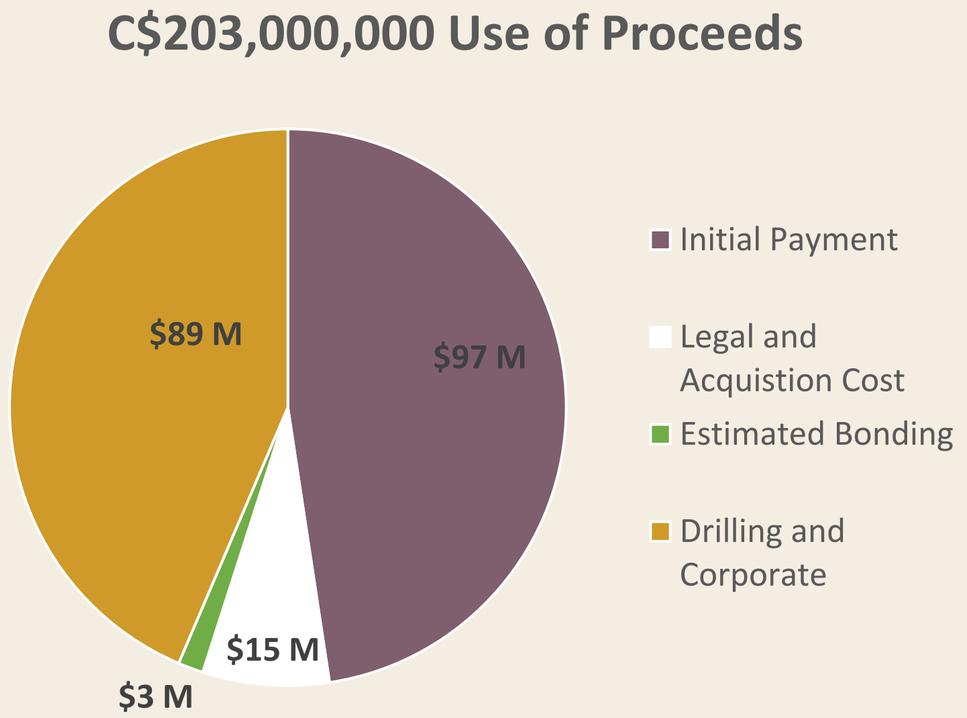
Northumberland's disclosed Indicated and Inferred Grades Compare Favorably to the Gold Grades of the Following Independent Gold Projects



Source: Latest available company materials as of January 2026. *Based on Independent open pit gold project in lower 48 U.S.

1. Independent refers to gold projects as not owned by Barrick or Newmont; Independent projects shown are from the lower 48 states in the U.S.
2. 2026 Technical Report
3. Open Pit Reserves only.
4. 2026 Technical Report
5. See slide titled Peer Project Resources & Reserves for source documents.

The acquisition in numbers. ($CM)



CASH AT CLOSE	CONTINGENT × 2	EQUITY FINANCING	Royalty Sale
$97M	$35M	$190M	$13M

Contingent Payments are structured after significant re-rating points. First contingent payment is **120 days post Feasibility Study**, the second is **120 days post Commercial Production**.

StrikePoint has sufficient working capital to significantly advance the **Northumberland Project**. Phase 1 will be to complete a new **Preliminary Economic Assessment** on the Project in **Early 2028**. Funds are sufficient to for a **Phase 2**, potentially a **Pre-Feasibility Study,** in 2028/2029.

Capitalization Structure

	PRE-TRANSACTION		POST-TRANSACTION	
	Current	**Post Consolidation[1]**	**Post Side Car [2]**	**Subscription Receipt Offering**
Share Price (C$)	$0.165	$1.65	$2.00	$2.00
Basic S/O (M)	62.4	6.2	7.2	102.2
Options	5.1	0.5	0.5	0.5
Warrants	37.1	3.7	4.2	10.3
Basic Market Cap. (C$M)	**$10.3**	**$10.3**	**$14.5**	**$204.5**
Basic Market Cap. (US$M)	**$7.4**	**$7.4**	**$10.3**	**$146.1**
Cash & Equivalents (US$M)	$0.0	$0.0	$1.4	$65.1[3]
Enterprise Value (US$M)	**$7.4**	**$7.4**	**$8.9**	**$81.0**

Note: Market data as of September 8, 2026
Note: F/X US$1.00 = C$1.40
1. *It is anticipated that the Company will complete a consolidation on a basis of ten (10) pre-consolidation shares for every one (1) post-consolidation share (the "**Consolidation**") prior to completion of the transaction.*
2. *Assumes side car private placement of C$2M of a $2.00 unit consisting of a share and half warrant at $3.00 (all on a post Consolidation basis).*
3. *Pro forma of illustrative C$190M equity financing and US$10M NSR funding, less US$70M for cash payment and transaction costs.*

1. Based on the post-transaction market cap, enterprise value and July 2026 MRE
2. Resources are converted to gold equivalents using spot metal prices as of August 17, 2026

FIVE REGIONAL TARGETS

Regional targets beyond the main resource.

TARGET 01

Adjacent to Open Pits

Potential gold extensions exist along northeast trending anticlines near and high-grade mineralization may be present at the contact between the Mt. Gooding granodiorite sill and the Roberts Mountain Formation - numerous areas currently untested.

TARGET 02

Caldera area

Open down-dip extensions of Zanzibar and Rockwell; missed vertical mineralization likely from sub-optimal drill orientation; hydrothermal pathways on the SW margin of the Mt. Gooding stock.

TARGET 03

Vinini

Conceptual target based on favourable stratigraphic repetition displaced by the Roberts Mountain thrust south of Mt. Gooding; supported by elevated surface gold and silver anomalies.

TARGET 04

SE Jasperoid & Dykes

Jurassic and Tertiary intrusions; jasperoid and hydrothermal alteration; anomalous gold in soils; and a dike swarm extending from Mt. Gooding stock.

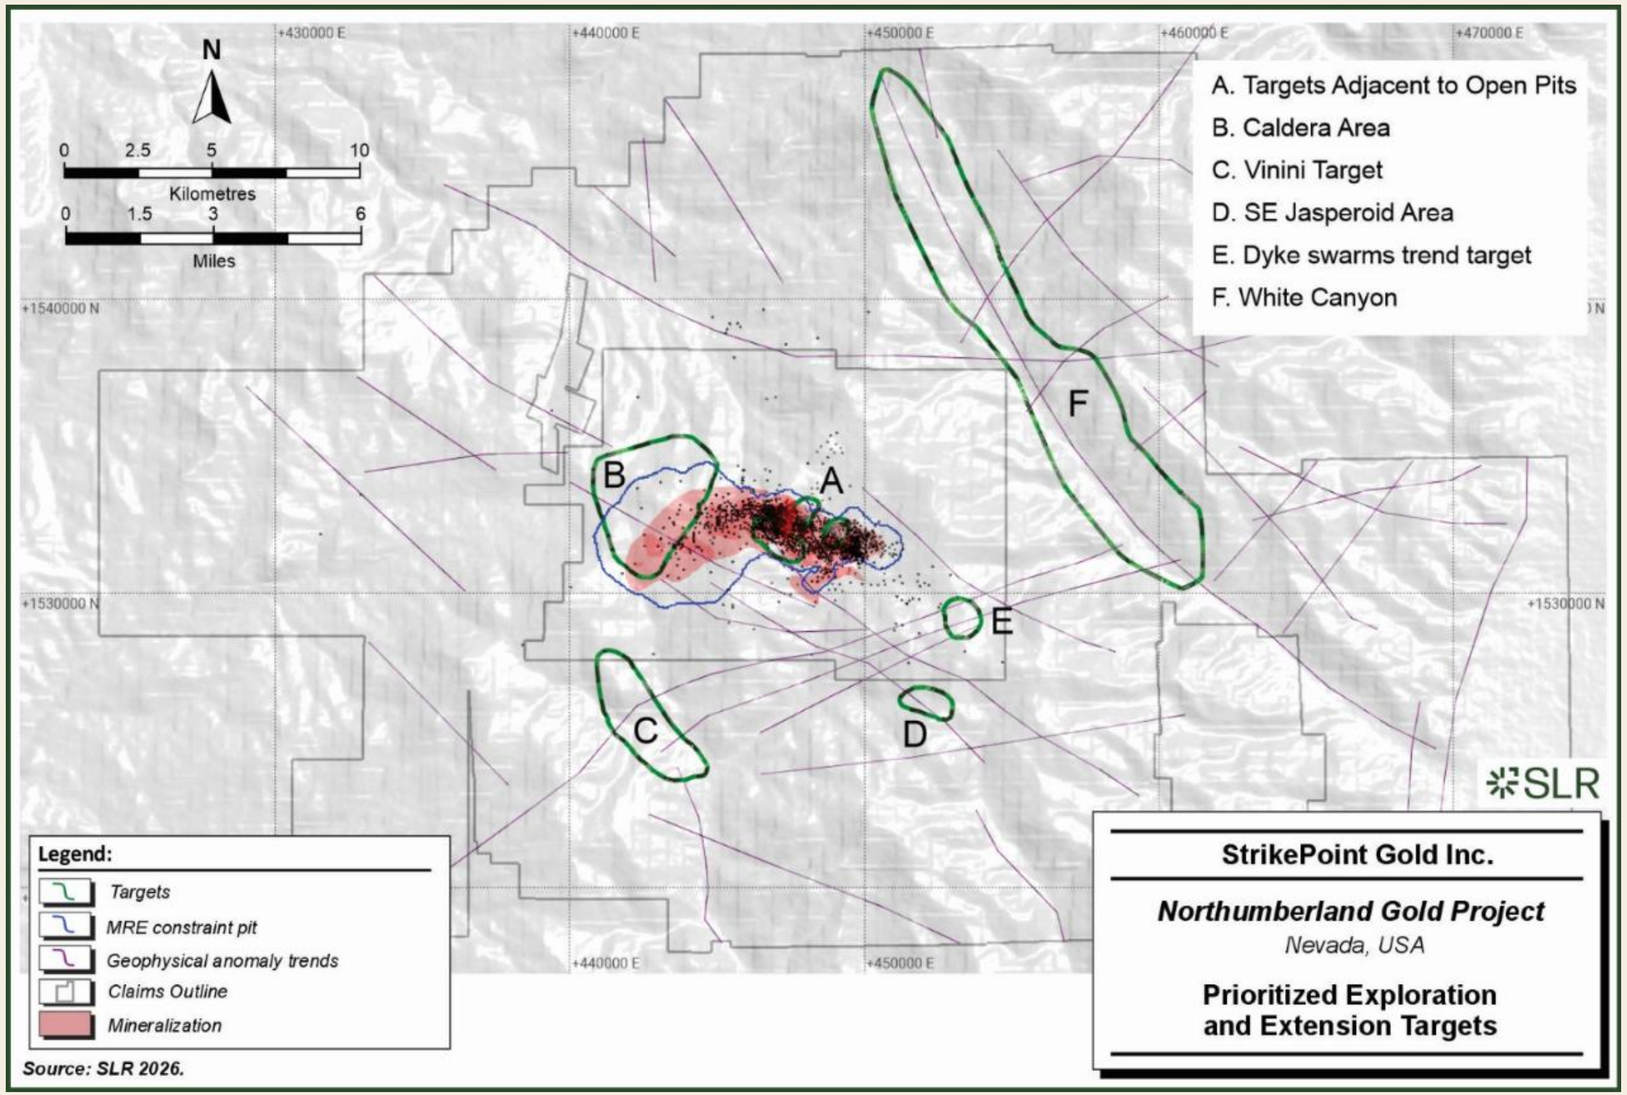
TARGET 05

White Canyon Fault Zone

A NW-trending structural zone with the strongest surface gold and silver soil anomalies outside currently drilled areas.

Data Source, 2026 Technical Report

Potential upside beyond the known mineralization

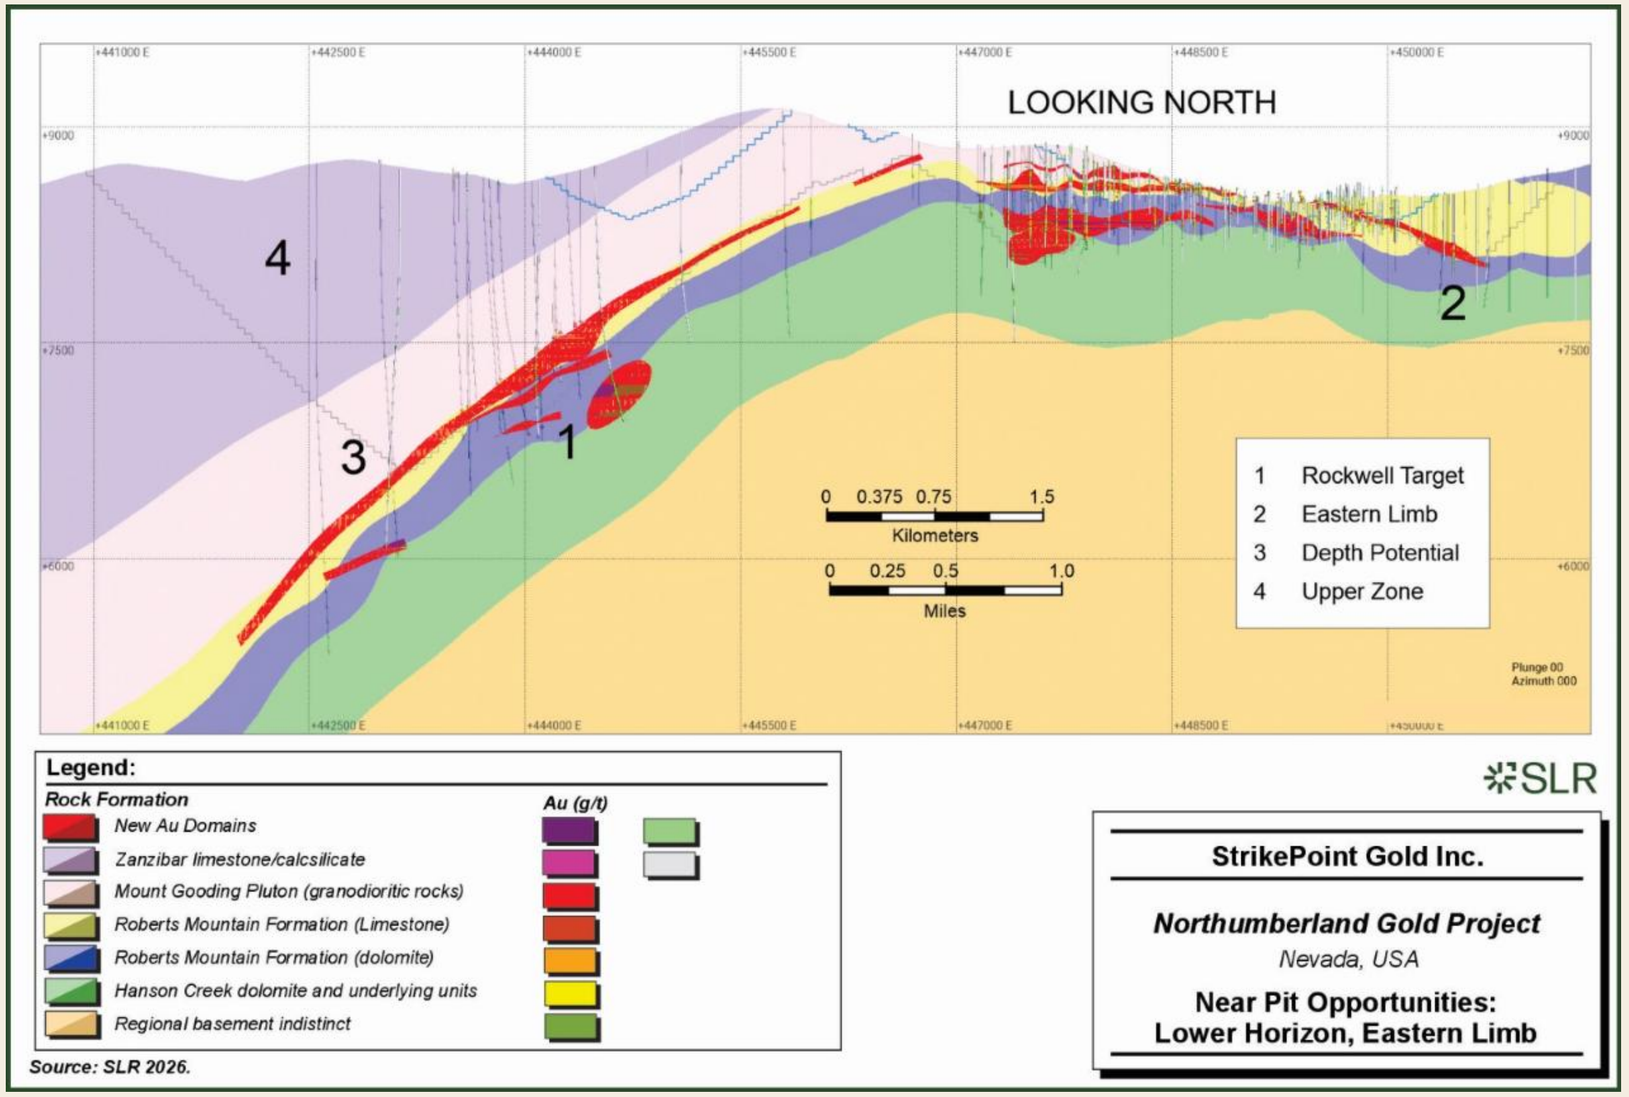


Room for Additional Exploration

Mineralization constrained by drilling, not geology

Extensions of known mineralization to be explored on private land

Potential for new discoveries on surrounding unpatented claims



Near Pit Opportunities. Lower horizon, eastern limb

OPPORTUNITY 01

Rockwell Target Untested lower horizon has opportunity to add mineralized tonnes

OPPORTUNITY 02

Eastern limb of the anticline — needs to be properly evaluated.

OPPORTUNITY 03

Down Dip Extensions

OPPORTUNITY 04

Poorly Sampled Upper Zones

Highlights from 2005-2007 Drilling At Northumberland

The historic drilling points to multiple avenues for resource expansion.

Grade-thickness mapping post-2009 drilling resolved the structural and stratigraphic controls across the Zanzibar deposit.

This knowledge shows where to effectively vector exploration for potential large high-grade intercepts

and	588.26	589.79	1.52	3.33
Note: *True thickness is estimated to be 70% to 100% of the interval length.				

Metallurgy:

Historical test work established that refractory ore responds well to POX followed by cyanide leach. However, additional modern metallurgical techniques will be tested before the final flowsheet is locked.

There has been no significant metallurgical work on the property in 15+ years. New processing techniques to deal with refractory mineralization, i.e., ultra-fine grinding, Albion, need to be tested.

In addition, blinding agents to reduce the amount of preg-robbing have not been tested. Modern reagents have proven to be effective in similar settings.

Go Forward Goal: PEA 2028

Permits in Hand will allow for a fast start on drilling. Rigs penciled in for a fall program.

Drillholes will be multi-purpose

- Resource confirmation and upgrading
- Metallurgical sampling of zones to create more comprehensive geo-metallurgical model
- Geotech data collection
- Resource expansion

Metallurgy

- Comparison of Pressure Oxidation, vs. ultra fine grind vs. Albion, whole rock vs. concentrate, onsite refining vs. offsite trade off, characterization of transition material if any.
- Local labs in Nevada are qualified to execute the program.

Permitting:

- Continue monitoring and reactivate baseline data collection

Let's talk *Northumberland.*

HEAD OFFICE

Suite 3123 595 Burrard Street Vancouver, BC

V7X 1J1

Additional Directors, Management and Advisors

Adrian Fleming – Director Geologist with 40+ years international experience in exploration, project development and mine operations. Led or part of gold discoveries at Porgera, PNG; Big Bell, WA; Gross Rosebel, Suriname; Hope Bay, Canada; and White Gold, Yukon, Canada. Founding director of Northern Empire, former director of Reunion Gold, currently director of Green Gold.

Ian Harris – Director mining engineer, is Chief Executive Officer Copper Giant. He has more than 25 years of mining experience, primarily in South America, advancing projects from exploration and feasibility through construction and operations. Harris began his career in ASARCO's management development program at the Ray copper mine in Arizona.

Darryl Jones – Director 15+ years of capital market experience and an established financial network. He was a founding Director at Alpha Lithium which sold for approx. $313 million (Dec 2023). Previously, Mr. Jones was an Investment advisor with PI Financial Corp Canada and Raymond James Ltd Canada. He was responsible for raising significant risk capital for growth companies in all sectors.

Paulo Santos – CFO Chartered Professional Accountant with over 20 years of extensive accounting, auditing, regulatory, public company, and mergers and acquisitions experience in the mining industry. He also holds a Bachelor of Business Administration (Accounting) from Simon Fraser University. Mr. Santos has previously held various senior executive financial roles within the mining industry.

Margot Naudie – Advisor **c**apital markets professional with over 25 years of global investment experience managing long/short and global natural resource portfolios. She has held senior roles at leading multi-billion-dollar asset management firms, including TD Asset Management, Marret Asset Management, and CPP Investment Board.
